

Case Study 3: Talent Acquisition Platform

Client Confidential

The problem

Our client was managing a 700 person recruitment process outsourcing firm using numerous spreadsheets. The leadership team was facing several challenges consolidating all the information to make any sense of it. The employee morale was low with a high attrition rate.

The solution

ThinkBridge completed an end to end study of the 'as is' process, completed a value stream mapping process to develop the to be. We also developed a cloud based technology solution that will eliminate all the spreadsheets, provide a delightful operations user experience and a robust analytics platform. The platform allowed our client to scale their business three times without adding any headcount

Technology Stack

Track	Strategy	Execution	Insights
Service	✓ Advisory Services	✓ Software Product Development	✓ Data Engineering
Offering	✓ CTO-as-a-Service	✓ Team-as-a-Service	✓ Insights-as-a-Service

Outcomes

Speed | Accuracy | Cost | Productivity | User Experience
